# AVAILABLE IN 4 WIDTHS

**STRIP LENGTH: 3.2m**

**WALL THICKNESS:      RECOMMENDED:**

4"

BK50

6"

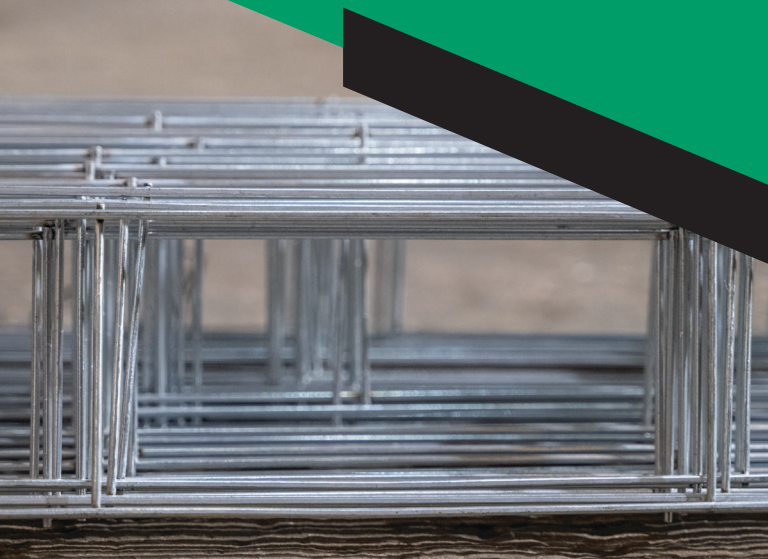

BK100

8"

BK150

12"

BK225

# WHY USE BRC BRICKFORCE?

By using BRC galvanised Brickforce in every 2nd or 3rd course within your brick or concrete blockwall, you're adding serious strength in all directions.

It helps resist cracking, helps the wall hold its shape, and even allows you to achieve the same strength with a narrower wall.

Tougher, stronger, and lasting longer...block walls with the reinforcing power of Brickforce!

For further information on  
BRC's quality range of standard  
and customised concrete  
reinforcement products,
